Summary

Full Stack Software Engineer with **4 years of experience** designing and building scalable web and mobile applications using **Flutter, React.js, NestJS, Node.js, PostgreSQL, MongoDB, AWS, Azure, and GCP**. Experienced in Microservices, Microfrontends, Payment Systems, Wallet Infrastructure, Automated Payout Workflows, Cloud-Native Deployments, CI/CD Automation, and Secure Backend Development. Strong understanding of System Design, Distributed Systems, Software Architecture, and Performance Optimization.

Key Achievements

- Migrated TalentDec backend from a monolithic architecture to 2 independently deployable services.
- Designed and implemented wallet infrastructure including payments, refunds, expert payouts, transaction history, reconciliation, and Stripe integrations.
- Strengthened platform security through VPC isolation, private networking, secure service communication, and cloud-native deployment strategies.
- Contributed to SchoolTalk's Microfrontends and Microservices ecosystem, comprising Auth, Progress, Progressions, SchoolTalk, and Shell applications.

Work Experience

Software Engineer, Talink Software India Pvt. Ltd. (Chandigarh) Jul 2024 – Present

- Led the decomposition of a monolithic backend into **2 independently deployable services**, improving scalability, fault isolation, maintainability, and deployment flexibility.
- Architected and developed **TalentDec** using **Flutter, NestJS, PostgreSQL, and GCP**, delivering a scalable expert-consultation platform.
- Designed and implemented the complete **payment ecosystem** including wallet management, payment processing, expert earnings, automated payouts, refunds, transaction history, and reconciliation workflows.
- Designed and implemented secure **wallet ledger workflows** for credits, debits, payouts, refunds, and transaction tracking.
- Integrated **Stripe** payment infrastructure with secure webhook processing, automated settlement workflows, and end-to-end transaction tracking.
- Developed and maintained **20+ REST APIs** using **NestJS** and **PostgreSQL** for mobile and web applications.
- Integrated **Zoom APIs** and webhook-driven event processing to automate meeting lifecycle management.
- Implemented **Firebase Authentication, FCM, and Remote Config** for secure authentication, notifications, and feature rollout management.
- Configured **Cloud Run, Cloud Scheduler, Cloud Storage, API Gateway, VPC, and Load Balancer** to support secure and scalable cloud-native deployments.
- Implemented **Azure Front Door/CDN** to improve global content delivery, application performance, and availability.
- Contributed to **SchoolTalk**, a large-scale education platform built on **Microfrontend and Microservices Architecture** comprising Auth, Progress, Progressions, SchoolTalk, and Shell applications.
- Developed AI-powered content summarization features using **OpenAI APIs**, enabling automated summary generation and improved user productivity.
- Developed reusable and loosely coupled frontend modules using **React.js, .NET, Azure, and Microfrontend Architecture**.

Software Engineer, Entiovi Technologies Pvt. Ltd. (Kolkata) Sep 2022 – Jun 2024

- Developed scalable web applications using **React.js, Next.js, Node.js, and Express.js**, delivering responsive and high-performance user experiences.
- Built and maintained REST APIs using Node.js and Express.js for logistics, recruitment, and AI-driven platforms.
- Built serverless backend services using **AWS Lambda** and **Azure Functions**, enabling scalable event-driven architectures.
- Designed and maintained PostgreSQL and MongoDB databases using Sequelize ORM and Mongoose ODM.
- Automated build, testing, and deployment workflows using **Azure DevOps** and **GitHub Actions**, reducing deployment effort by 40%.
- Implemented Firebase Cloud Messaging and Service Workers for real-time notifications and improved user engagement.
- Contributed to major platforms including **Bulkmatic**, **ClearedTalent**, **Teach195**, and **Alfa**, delivering frontend and backend features across logistics, recruitment, education, and AI domains.
- Collaborated in Agile teams, participating in sprint planning, code reviews, production deployments, and issue resolution.

Projects

SchoolTalk Website
Developed and enhanced multiple education-focused modules including **Progress Analysis, Tracker, Overview, Gap Analysis, Test Results, and Calendar** using React.js and Microfrontend Architecture. Replaced legacy UI components with modern, reusable implementations, improving maintainability, user engagement, and application performance. Built and integrated APIs supporting custom and system-generated test workflows.

TalentDec AppStore | PlayStore | Website
Architected and developed a scalable expert-consultation platform using Flutter, NestJS, PostgreSQL, and GCP. Built wallet infrastructure, Stripe payment processing, automated expert payouts, Zoom integrations, Firebase notifications, AI-powered summary generation using OpenAI APIs, and secure microservice-based backend architecture.

Bulkmatic Website
Developed logistics and transportation workflows including carrier management, order scheduling, terminal operations, and authentication modules. Implemented secure authentication using **Microsoft Account Login** and **Google Sign-In**, and built REST APIs supporting logistics operations across North America.

Teach195 Website
Enhanced Flutter-based recruitment platform for UK schools by developing new features, optimizing application performance, integrating backend APIs, and improving overall user experience across mobile workflows.

ClearedTalent Website
Built frontend features and backend APIs for a talent marketplace platform enabling candidate assessments, profile management, job matching, and recruitment workflows using Next.js, Node.js, and MongoDB.

Alfa Website
Developed frontend modules and backend integrations for an AI-powered financial crime prevention platform, enabling analysts to investigate alerts, manage cases, and reduce false positives through intelligent workflow automation.

Skills

Languages	JavaScript, TypeScript, Dart, Java
Frontend	React.js, Next.js, Flutter, Redux Toolkit, Material UI
Backend	Node.js, NestJS, Express.js, REST APIs, Microservices
Databases	PostgreSQL, MongoDB, Firestore, MySQL
Cloud	Google Cloud Platform (Cloud Run, Cloud Scheduler, Cloud Storage, VPC, Load Balancer, API Gateway), AWS (Lambda, CloudWatch), Azure Functions, Azure Front Door/CDN
DevOps	Docker, GitHub Actions, Azure DevOps, CI/CD
Payments	Stripe, Payment Gateways, Wallet Infrastructure, Automated Payouts, Webhooks
Search & Messaging	Algolia, Firebase FCM, Push Notifications
AI & Agent Tooling	OpenAI and Claude APIs, Claude Code, Codex, Cursor, Prompt Engineering, AI-assisted Software Development
Core CS	System Design, Distributed Systems, Design Patterns, SOLID Principles, Computer Networks, DBMS, Operating Systems, DSA

Education

2024 – 2026 Master of Computer Applications (MCA), **ISBM University, Gariaband**
2018 – 2022 B.Sc. Mathematics (Hons.), **VKSU, Ara**

Certifications

React – The Complete Guide	Udemy (Maximilian Schwarzmüller)
Node.js, Express, MongoDB & More Bootcamp	Udemy (Jonas Schmedtmann)

Languages

English, Hindi
